intentioned ideas into (___321___) will take some doing. For a start, the guidelines for admissions under the RTE prohibit schools from conducting any sort of student profiling. The stress on a random yet justifiable admission process means that schools will have to resort to something as quirky as a lottery system. However, leaving admission to a good school to pure (___322___) will only incentivise manipulations, defeating the very essence of RTE. The main problem facing the education sector is that of a resource crunch. The provisions for ensuring universal access to education are all very well, (___323___) we have the infrastructure in place first. Brick and mortar schools need to precede open admission and not the (___324___) way around. In that sense, legislators assessment of ground realities is (___325___) target when they endorse the closure of tens of thousands of lowcost private schools for not meeting the minimum standards of land plot, building specifications and— CLOZETEST playground area as laid out in the RTE Act. Instead of bearing down (___326___) on private schools for falling to conform to abstract bureaucratic criteria, efforts to bring sibout universal education should focus on upgrading and expanding the existing government school infrastructure to accommodate all . Only then can we ensure the much needed supplydemand (___327___) in the education sector.

Q318.

318.

- (a) with
- (b) for

- (d) attempt
- (e) aspects

Directions: in the following passage there are blanks, each of which has been numbered. against each number, five words are suggested, one of which fits the blank appropriately. find out the appropriate word in each case.

The (___328___) of India as an economic superpower Is not reflected in the (___329___) of life enjoyed by its 1.2 billion citizens according to the Human Development Index which (___330___) India very low among ___182___ countries. In our performance oriented world, measurement issues have taken on (___331___) importance as what we measure affects what we do. In fact the French President has

established an international commission on the Measurement of Economic Performance and Social Progress owing to his (___332___) and that of others with the current state of statistical information about the economy and society. The big question concerns (___333___) Gross Domestic Product, (GDP) provides a good measure of living standards. In many cases GDP statistics seem to (___334___) that the economy is doing far better than most citizens feel it is. Moreover the focus on GDP creates conflicts while political leaders are told to maximise it, citizens also demand that (___335___) be paid to enhancing security, reducing air, water and noise pollution all of which actually (___336___) GDP growth. Statistics are (___337___) to summarise what is going on in our complex society, it is therefore obvious that we can't reduce everything to a single number GDP.

Directions: in the following passage there are blanks, each of which has been numbered. against each number, five words are suggested, one of which fits the blank appropriately. find out the appropriate word in each case.

It is noteworthy that the prime ministers working group set up to suggest longterm solutions to (___338___) the graying demand for affordable food has acknowledged the use of biotechnology as integral to a second Green Revolution. Although Indian agriculture serves as a good example of incorporating hybrid varieties of highyielding crops, the attitude towards genetically modified or transgenic food has been sceptical. Bt cotton is the only (___339___) crop currently approved for (___340___) in India. Bt brinjal is under moratorium for commercial release. In a country where ___65___ per cent of agricultural land is still (___341___) on the monsoon, there needs to be far greater investment in biotechnology driven solutions to increase yields. True, there are valid health and environment (___342___) regarding the adoption of GM crops. It is for this reason that adequate (___343___) need S

to be in place to ensure consumer i safety. But an (__344__) rejection of genetically modified food would be (__345__) i to the country's food security. ,Given the huge deficit between demand and production, there is an urgent need to adopt a (__346__) approach to agriculture. Brazil serves as a good example. Over the last 40 years the South American nation has scripted an agricultural revolution in the dry plains of the country by providing basic inputs on a large scale and vigorously adopting GM crops. There is no rea son why India can't (__347__) this. Storage and delivery is the other side of the problem that can be significantly mitigated by policy decisions that allow for greater FDI in retail. Scientific innovations combined with a farsighted farm to fork agriculture strategy are the answer to India's growing food needs.

Directions: in the following passage there are blanks, each of which has been numbered. against each number, five words are suggested, one of which fits the blank appropriately. find out the appropriate word in each case.

The economics of owning and running a Ration Shop, the familiar name for the outlets in our Public Distribution System (PDS), are such that under normal business terms, the shop owner could never make a profit. Yet, (__348__) The government announces that new permits for ration shops will be given out, there is frenzy in the market to grab one of these. (__349__) ? The answer is obvious the business is not for the honest and if one knows the (__350__), there is a fortune to be made. What are these tricks of the trade? Getting fake names into the user 1 list is the most obvious option the State seems to be (__351__) a losing battle against this practice, judging by the endless efforts to weed out bogus registrations. The next is to get the right customers on the list, not just more customers. These are people who are registered but who do not have any interest in (__352__) on their entitlements. In a system where caste and income

certificates are for sale, it is not (___353___) to produce these documents for mutual benefit. Receipts are duly made in their names, and the rations thus drawn are (___354___) off into the open market. The sale price of an item like rice makes clear the (___355___) economics it costs ? , **8** in a ration shop while in the latter it is ? **30** or above. There are also customers who would rather exchange their entitlements for hard cash at the , beginning of the month. As the degradation progresses, the shop keeper, in (___356___) with the official machinery, manages to withhold effectively the entitlements from even the genuine beneficiaries, and diverts them to the open market. The targeted group is usually not in a position to (___357___) itself to get **1** its due. And thus one has all (___358___) of a good PDS business.

Directions: in the following passage there are blanks, each of which has been numbered. against each number, five words are suggested, one of which fits the blank appropriately. find out the appropriate word in each case.

Can an experiment conceived, carried out, and reported in kids speak with pencil coloured figures and handwritten tables by school children aged **8** to **10** years get published in a highly rated international journal following a peer reviewing process? Twenty seven schoolchildren from a Primary School In U.K. have proved this is (___359___) — if a simple but novel scientific question raised is (___360___) in a scientific way. Their paper wits published in the Royal Society's Biology Letters journal. Their (___361___) was that bumblebees can use a combination of colour and

spatial relationships in deciding which colour of flower to forage from. Considering that our understanding of how bees perceive coloured patterns and scenes is inadequate, this inspiring outcome has shown that schoolchildren guided by gifted teachers can think and (362) out experiments like any hardwired scientist. For these, kids, doing science changed their (363) of the Subject. Science also became cool and fun. This refreshing approach turns the spotlight on the best methods of teaching science. The (364) learning system adopted by most schools in India, even classroom study combined with some laboratory work with predefined outcomes, does very little to (365) curiosity and interest in science. Is that one of the (366) why out of the box thinking that produces path breaking science rarely comes out of Indian laboratories? The children at the U.K. school had their gifted teacher to guide them. Scientists from India's space and atomic energy departments and in some other places where serious science is done can take a (367) out of the schools book and (368) the way in engaging with school pupils and getting them to do real science.

Directions: in the following passage there are blanks, each of which has been numbered. against each number, five words are suggested, one of which fits the blank appropriately. find out the appropriate word in each case.

Depending upon how humanity chooses to use it, technology can enhance or (369) any aspect of life. The realm of interpersonal communication generally feels this impact first. Many times throughout history, humanity has changed its modes of communication as society itself has (370). As people began to spread out geographically, verbal communication turned to writing to make it more (371). Then, people invented ways of carrying both conversation and written communication between their communities to keep in (372) with one

another as travel became simpler. With the advent of the telephone, people began to wonder if picking up the receiver to call one another would eventually (___373___) out other forms of communication. So far, as families and friends have moved away from one another, the telephone, even its cellular form, has allowed humanity to (___374___) the necessary links among its members. Naturally, now that computers, instant and text messaging, and other forms of communication have found their way into the world, people not familiar with these technologies wonder what they will do to the human race. Etiquette experts and those raised on writing formal letters often (___375___) that email and text message lingo will replace the language of pen and paper. This will not (___376___), and both methods of communication can survive to enhance humans enjoyment of one another's company if the next generation learns how to (___377___) both. Each form of communication can survive with its own rules as people learn which situations in life (___378___) for which level of formality and which of the people they spend time with can connect better with which type of language.

Directions: in the following passage there are blanks, each of which has been numbered. against each number, five words are suggested, one of which fits the blank appropriately. find out the appropriate word in each case.

As the country embarks on planning (___379___) the 12th Plan (2012-17) period, a key question mark (___380___) hangs over the process is on the energy requirements. Growth is energy hungry, and the aspirations of growing at 910% will (___381___) huge demands on the energy resources of the country. In this energy jigsaw, renewable energy will (___382___) like never before in the 12th Plan and (___383___). By the rule of the thumb, India will (___384___) about 100 gigawatts (Gw) 100,000 megawatts of capacity addition in the next five years. Encouraging trends on energy efficiency and sustained (___385___) by

some parts of the government the Bureau of Energy Efficiency in particular needs to be complimented for this have led to substantially lesser energy intensity of economic growth. However, even the tempered demand numbers are (388) to be below 80 Gw. As against this need the coal supply from domestic sources is unlikely to support more than 25 Gw equivalent capacity. Imported coal can add some more, but at a much (387) cost. Gasbased electricity generation is unlikely to contribute anything substantial in view of the unprecedented gas supply challenges. Nuclear will be (388) in the foreseeable future. Between imported coal, gas, large hydro and nuclear, ho more than 1520Gw equivalent can be (389) to be added in the five year time block.(390) (391) this, capacity addition in the renewable energy based power generation has touched about 3Gw a year. In the coming five years, the overall capacity addition in the electricity grid (392) renewable energy is likely to range between 20Gw and 25Gw. Additionally, over and above the grid based capacity, off grid electric places and (393) lives where grid based electricity supply has miserably failed.

Directions: in the following passage there are blanks, each of which has been numbered. against each number, five words are suggested, one of which fits the blank appropriately. find out the appropriate word in each case.

I wanted to (___414___) myself a sweater. When I asked my mother for some wool, she directed me to the old cloth bag under the stairs. This was the bag (___415___) which my mother had over the years (___416___) all the remains from sweaters, scarves, cardigans and gloves that she had knitted for herself (___417___) the family. When I opened the bag **1** screamed What a mess I All the wool had tangled itself into a huge knot. I said to my mother, It's hopeless. All the wool is so badly mixed. (___418___) can I even detangle it, let alone knit a sweater from It. She smiled and said Its easier (___419___) you think. All you have to do is look for the easiest knot and undo that. (___420___) that is done, the next knot will be easier. Just keep on doing this, until all the wool is unravelled. I (___421___) as my — mother had told me to, and sooner than I had thought, the wool started to loosen and different colours (___422___) to emerge. Very soon, instead of one huge untidy bunch of wool I had several neat balls in (___423___) of me.

- (e) awe

Directions: in the following passage there are blanks, each of which has been numbered. against each number, five words are suggested, one of which fits the blank appropriately. find out the appropriate word in each case.

A mobile phone is no (___424___) a simple device to make calls. It has (___425___) the hub for all your activities from emailing and browsing to paying bills and transferring money. Banks may have been the first to (___426___) their feet into this technological pool, but telecom companies have (___427___) to catch up. The RBIs step to remove the **50,000** cap that it had (___428___) earlier on daily much needed (___429___) to mobile banking. Mobile banking (___430___) you to conduct financial transactions on your phone just as you would at a bank branch or through Net banking. Banks are now evolving this facility as they launch innovative products. For (___431___). A Bank's cash to mobile service (___432___) customers to transfer money to anybody, including those who do not have a bank

account. A bank customer can download the banks application on his phone and then put in the phone number of the person to whom he wants to send the money, along with the transaction amount. The bank will send a message to the remitter and the beneficiary along with different PINs to each. The remitter will have to message his PIN to the beneficiary, who can then use both PINs and his mobile number to withdraw cash from the respective Bank ATM. The service is (___433___) but operator charges will apply. Also, the sender will need a Java enabled handset.

Directions: in the following passage there are blanks, each of which has been numbered. against each number, five words are suggested, one of which fits the blank appropriately. find out the appropriate word in each case.

Indian culture is rich and (454) and as a result unique in its very own way. Our manners, way of communicating with one another, etc are one of the important components of our culture. Even though we have accepted modern means of living, improved our lifestyle, our values and beliefs still remain unchanged. A person can change his way of clothing, way of eating and living but the rich values in a person always (455) unchanged because they are deeply rooted within our hearts, mind, body and soul which we receive from our culture. Indian culture (456) guests as god and serves them and takes care of them as if they are a part and parcel of the family itself. Even though we don't have anything to eat, the guests are never left hungry and are always looked after by the members of the family. Elders and the respect for elders is a major component in Indian culture. Elders are the (457) force for any family and hence the love and respect for elders comes from (458) and is not artificial. An (459) takes blessings from his elders by touching their feet. Elders drill and pass on the Indian culture within us as we grow. Respect one another is another lesson that is taught from the books of Indian culture. All people are alike and respecting one another is one's duty. In foreign countries the relation (460) the boss and the employee is like a (461) and slave and is purely monetary whereas in Indian culture the relation between the boss and the employee is more like homely relations unlike foreign countries. Helpful nature is another (462) feature in our Indian culture. Right from our early days of childhood we are taught to help one another (463) help and distress. If not monetary then at least in kind or nonmonetary ways. Indian culture tells us to multiply and distribute joy and happiness and share sadness and pain. It tells us that by all this we can develop cooperation and better living amongst ourselves and subsequently make this world a better place to live in. Even though India is a country of various religions and caste our culture tells us just one thing phir bhi dil hai Hindustani.

With the U.S. military tied down on two fronts and the rest of the world growing (___464___) to American power, the challenges for Rice are as (___465___) as they have been for any Secretary of State in the past three decades. After six years of tussling with others on Bush's national security team, Rice has seen off her rivals and (___466___) as the principal spokesperson for Bush's foreign policy. Her reward has been to (___467___) responsibility for selling a failed policy in Iraq and framing a legacy for Bush at a time when (___468___) in the world are in the mood to help her. Bush is severely (___469___) and has very little credibility or support at home or abroad, says Leslie Gelb, former president of the Council on Foreign Relations. That is (___470___) true for his Secretary of State. So they are basically flailing around. That's a grim assessment, since the (___471___) to international order are bigger today than at any other time since the end of the cold war. The most immediate source of (___472___) emanates from Iraq, where the country's civil war risks (___473___) a region wide conflict.

Directions: in the following passage there are blanks, each of which has been numbered. against each number, five words are suggested, one of which fits the blank appropriately. find out the appropriate word in each case.

The (474) of losing your job is getting smaller and smaller. As economy has improved and employers have (475) confidence, companies have been steadily shedding fewer workers. The trend means greater job security and suggests a critical turning point in the economic recovery. It (476) the hope that workers pay will finally accelerate after grinding through a sluggish recovery for the past half decade. When the economy, (477) into recession at the end of **2007**, employers cut deeply into their staffs. And then during the recovery, they hired only (478). Instead, they sought to maximize the productivity of their existing employees. But in recent months, the picture has (479). Employers have added **200,000** plus jobs for five straight months, and the unemployment rate has reached **6.1** percent, the lowest since **2008**. Now, the steadily declining level of layoffs suggests that employers may have to hire even more (480) and raise pay if they want to expand their businesses. The shortage of laid off workers searching for jobs means that more companies may need to pay more to (481) talent. Other data confirm that across the economy, job cuts have reached unusually low levels. Total layoffs in May dropped below prerecession levels. Still, while layoffs have fallen **7.5** percent this year, actual hiring has increased just **3** percent. That's a big reason the job market might not seem as healthy as the series of strong monthly net job gains might suggest. Even so, more people with Jobs means more people with paychecks, which tends to (482) consumer spending and growth. After a sharp (483) in the economy in the first three months of the year, most economists expect growth to exceed a **3** percent annual pace in the second half of **2014**.

Directions: in the following passage there are blanks, each of which has been numbered. against each number, five words are suggested, one of which fits the blank appropriately. find out the appropriate word in each case.

There is already an extensive empirical literature often using growth accounts that (___484___) these and other aspects of India's economic growth. Many of the studies (___485___) one or more of the following topics. First, a number of analysts (___486___) focused on characterizing India's economic performance at the most aggregate level. While there is agreement that growth did indeed improve during the past quarter century, researchers have reached varying conclusions on some issues such as the timing and precise magnitude of this acceleration, and the relative importance of changes in domestic policy. There are ongoing discussions over the extent to which the current growth can be maintained and various means by (___487___) it might be increased. Second, analysts have examined the behavior of particular output sectors. A number of authors have studied productivity in manufacturing reaching a wide range of conflicting conclusions. However, as explained in detail by Goldar and Mitra (2002), differences in the findings can be (___488___) to a variety of measurement issues, such as the use of single versus double deflation to construct estimates of real growth¹ in manufacturing value added. Goldar (2004) provides a careful recent update showing that TFP growth in manufacturing (___489___) to have slowed in the post reform period raising additional puzzles discussed below. However, (___490___) difficulties in measuring employment within individual industries, our analysis focuses (___491___) on the broader industrial sector. The 3 studies that focus on India's services sector (many of which discuss the issue of sustainability), and those that discuss agriculture, are discussed in the body of the paper. Given the large body of prior research, many of the results to be discussed below (___492___) already well known to those in the field. Nonetheless, this paper seeks to make a contribution to drat literature in a variety of ways. In particular, the growth accounting framework, combined with our emphasis on data issues, pulls together concerns that have typically been treated separately, and in some cases, raise, implications that do not appear to have been (___493___) recognized. Our updated growth accounts incorporate recent data revisions, some of which are quite large. They also provide new estimates for the contributions to overall growth of labor productivity growth within the major economic sectors. Versus the gains from real location of labor and capital among the factors. Furthermore, we have examined a variety of additional data in our analysis of the role of capital accumulation providing estimates of the returns to schooling for human capital, and reporting on trends in sectoral saving and investment, for physical capital. Thus, this paper is comprised of four remaining sections. The next section details the construction of growth accounts for India, with considerable attention paid to the quality of the underlying data.

Directions: in the following passage there are blanks, each of which has been numbered. against each number, five words are suggested, one of which fits the blank appropriately. find out the appropriate word in each case.

Economic development of country is (__494__) to their industrial growth. In a developing country like India, Small—Scale Industries play a significant role In economic development of the country. They are a (__495__) segment of Indian economy in terms of their contribution towards country's industrial production, exports, employment and creation of an entrepreneurial base. These industries by and large represent a stage in economic (__496__) from traditional to modem technology. Small industry plays a very important role in widening the base of entrepreneur ship. The development of small industries (__497__) an easy and effective means of achieving broad based ownership of industry, the diffusion of enterprise and initiative in the industrial field. Given their importance, the Government policy framework right from the First plan has (__498__) the need for the development of SSI sector keeping In view its (__499__) importance in the overall economic development of India. Accordingly, the policy support from the Government towards Small Scale Industries has tended to be (__500__) and favourable to the development of small entrepreneurial class. Government accords the (__501__) preference to development of SSI by framing and implementing (__502__) policies and promotional schemes. The most important promotional policy of the Government for the SSIs is fiscal (__503__) in the form of tax concessions and exemptions of direct or indirect taxes leviable on production or profits.

Agriculture is a (___514___) sector of our economy and credit plays an important role in increasing agriculture production. Availability and access to adequate timely and low cost credit from institutional sources is of great (___515___) especially to small and marginal farmers. Along with other inputs, credit is essential for establishing sustainable and (___516___) farming systems. Most farmers are small producers engaged in agricultural activities in areas of widely (___517___) potential. Experience has shown that easy access to financial services at affordable cost (___518___) affects productivity, asset formation and income and food security of the rural poor. The major concern of the Government therefore, is to bring all the farmer households within the banking (___519___) and promote complete financial inclusion, The Government has initiated several policy measures to improve the accessibility of farmers to institutional sources of credit, The (___520___) of these policies has been progressive institutionalisation for providing timely and adequate credit support to all farmers in order to (___521___) them to adopt modern technology and improved agricultural practices for increasing agricultural production and productivity. The policy (___522___) emphasis on (___523___) credit flow at the ground level.

Although John Wisdom's writings in philosophy show clearly the influence of Wittgenstein, they nevertheless also display a 1 originality. Despite the 2 and difficult of his style, a careful reading of Wisdom is seldom 3. He is unique kind of genius in philosophy. This essay is an excellent example of Wisdoms repeated attempts to 4 the ultimate bases of philosophical perplexity. A great deal of the time Wisdom is interested in finding out why metaphysicians feel S to utter such strange sentences (e.g. Time is unreal, There are no material things, etc). According to Wisdom such sentences are both false (and perhaps meaningless) and yet 7. Even more than Wittgenstein, Wisdom has stressed the therapeutic conception of philosophy, a view that comes out, clearly in this essay where he emphasises the analogy between philosophical and neurotic distress 8 them with other kinds of problems. The reader who is interested in gaining a fuller 9 with Wisdoms thought is referred to his famous article Gods in philosophy and Psycho analysis. Other minds in Wisdoms most 10 discussion of a single topic and in many his finest work.

The first proposal I submitted for my dissertation at UCLA was to write a theory of personality. My chairman, a kindly man, smiled 51 and told me that perhaps this was a bit ambitious for a young graduate student. 52 I accepted his verdict and changed my topic, but not my desire. It 53 later, when I had a chance to begin to 54 a theory in my research on group dynamics for the Navy during the Korean War. As I 55 the reasons for the persistence of my interest in overarching theory, I had an 56 memory. When I was around eight years old, I was a 57 baseball fan, as was my father. My hero was Lou Gohrig. I would approach my father in an attempt to prove to him how good Gohrig really was. He hit 363, had 49 home runs, batted in 165 runs. He's terrific. My father's response caught me off guard. Yes, but he can't field. I wasn't prepared for that. From then on, my way of 58 with my father's responses was to make sure I knew everything about any topic I wanted to talk to him about. Partly as a 59, I became a honest, I had to make sure I had 60 for everything.

Lately, the media seems to have gone berserk in (___61___) everything that pertains to the New Economy . Behind the great bulk of the articles on the subject are two (___62___) assumption. First, that the New Economy businesses are likely to push Old Economy industries all the way into oblivion. Second, that (___63___) about the New Economy is far superior to that of the Old Economy. Both those emphatic assumptions could be (___64___) flawed. Physical products—the cornerstone of the Old Economy—are hardly likely to (___65___) out in importance even in the age of the Internet. After all, the consumption of physical goods is hardly going down. In everything—from steel automobiles (___66___) Is only going up. But above and beyond all this, the New Economy also needs Old Economy products to survive. You can sell goods on the Internet, ater all, only if (___67___) is producing those goods. Besides which, people still want all those Old Economy goods. As far as the second point is concerned, the one big weakness about the new Economy is that it is (___68___) more volatile than the Old Economy. The rate of evolution of products—the crux of the Old Economy—will (___69___) always be slower than the rate of the growth and proliferation on new ideas on any given subject. And hence, the Old Economy (based on products) will always be relatively more (___70___) than the New Economy (based largely on ideas).

Directions: in the following passage there are blanks, each of which has been numbered. against each number, five words are suggested, one of which fits the blank appropriately. find out the appropriate word in each case.

In an upper class drawing room in Mumbai, a dozen or so (___81___) the city's intelligentsia is (___82___) on the dregs of what was a livewire party an hour ago. Poets, editors, writers, filmmakers, all card-carrying members of the rich and powerful, not at this late hour, on their I their ninth drink are (___83___) in what Indians are best known to do media bashing, armchair criticism and name-calling. Inevitably the talk turns to Tehelka, and its managing director and editor-in-chief, Tarun Tejpal, and the party quickly degenerates into an orgy of guilt and shame and

that peculiar habit of the Indian intelligentsia passing the buck, with every one present attacking his neighbour for not supporting Tejpal more. It is a trait Tejpal is (___84___) with and has been telling me about in the weeks preceding this interview. Often at parties when someone (___85___) me great job, cany on what you are doing, and showers with me staggering praise, staggering love, staggering (___86___) I just smile and let it pass as I dont want to score a brownie point and say, and what about you boss, what will you do ?This lightly tossed sentence with the slightest hint of a dark chuckle is the only time I have seen Tejpal allow for bitterness, though I have been (___87___) him for weeks for sings of it. Because, for a man who has been the victim of the most (___88___) government witch hunts in recent years, Tejpal is astonishingly devoid of (___89___) You expect him to rage, to spew fire, to heap scorn and anger at his enemies, and instead, what you encounter, is a man in whose eyes you see only compassion and a weary understanding of the nature of the beast. The abiding irony in all this is that unlike his armchair supporters in the middle class, who rave and rant on his behalf, but do nothing else, Tejpal displays forbearance. The fact that I am essentially a literary animal and that my entire sensibility has been shaped by literature has helped. I'm not a black and white person. Im a (___90___) who understands the greys, he says to me at a coffee shop, over tea.

(c) youth

(d) human being

(e) fellow

Directions: in the following passage there are blanks, each of which has been numbered. against each number, five words are suggested, one of which fits the blank appropriately. find out the appropriate word in each case.

Many kinds of insects are (___91___) and larger animals learn to (___92___) eating them. It is in the (___93___) of these insects to show a (___94___) flag of some kind. The typical wasp, for example, ___195___ a conspicuous colour pattern of black and yellow (___96___) on its body. This is

(___97___) distinctive that it is easy for a (___98___) animal to remember it. After a few unfortunate experiences it quickly learns to (___99___) insects bearing this pattern. Other, unrelated, poisonous insect species may also carry a similar pattern. They become members of what has been called warning club. The important point for us, in the present (___100___) is that some harmless species of insects have taken (___101___) of this system by developing colour patterns similar to those of the poisonous members of the warning club. Certain innocuous flies, for instance, (___102___) black and yellow bands on their bodies that mimic the colour patterns of the wasps. By becoming (___103___) members of the warning club they reap the benefits without having to (___104___) any real poison. The killers dare not attack them, even though they would, in reality, make a (___105___) meal.

Q614.

91.

(a) flying

(b) conspicuous

(c) vulnerable

(d) big

(e) poisonous

Q615.

92.

(a) desist

(b) adjust

 (e) load,
Q628.
 105.
 (a) troublesome
 (b) delicious
 (c) indigestible
 (d) hazardous
 (e) cheap

Directions: in the following passage there are blanks, each of which has been numbered. against each number, five words are suggested, one of which fits the blank appropriately. find out the appropriate word in each case.

Most of us are (__106__) of open Conflict and avoid it if we can. And there is a (__107__) to expressing and working through conflict. If the working through involves harsh words and name-calling people feel deeply hurt mid relationships Can be (__108__). Sometimes permanently. Sony group members may be afraid that if they really (__109__) their anger, they may go. out Of control and become violent or they may do this. These fears can be very (__110__) and based on experience. So why take the risk ? Why not avoid conflict at all costs ? Conflict is rather like disease (__111__) is best. That means attending to areas where (__112__) may occur before they become an issue. If you have not (__113__) a conflict happening, your next choice is to treat it early, or hope that it goes away. If it goes away over time fine. If it (__114__), then you will still have to handle (treat) it and it is likely to be more (__115__).

- Q629.**
 106.
 (a) scared

- (c) fraudulent
- (d) urgent
- (e) skilled

Directions: in the following passage there are blanks, each of which has been numbered. against each number, five words are suggested, one of which fits the blank appropriately. find out the appropriate word in each case.

Economic growth figures for the first quarter of this financial year seem to support the claim that the worst may be over for the Indian economy. The gradual revival is also an indication that the governments economic stimulus package is (116). What could, however, upset the positive outlook is the drought which (117) large parts of the country and its impact on overall growth. Even though the monsoon had picked up (118) the rains received were grossly (119). There are clear (120) that farm output, particularly cereals, will fall drastically. Insufficient rain is bound to shoot up the (121) of agricultural commodities and that would impact the economy as a whole. The drought would also (122) a drastic reduction in rural employment and consumption besides inflation in the prices of food articles. Food prices have been (123) since the past few months, and lower agricultural production, is likely to (124) the situation. The government has said that food grain from the buffer stocks will be used to keep prices (125). Subsidised food grain is necessary in these times, but its effectiveness will depend a lot on the distribution system.

Q639.

116.

- (a) impractical
- (b) ambiguous
- (c) failing
- (d) working
- (e) weakening

Q640.

117.

- (a) strike
- (b) affected
- (c) exposed
