

## S.I. Units of Physical Quantity

| S. No | Quantity                           | SI                                | Symbol                            |
|-------|------------------------------------|-----------------------------------|-----------------------------------|
| 1.    | Length                             | meter                             | M                                 |
| 2.    | Mass                               | kilogram                          | Kg                                |
| 3.    | Time                               | second                            | S                                 |
| 4.    | Work and Energy                    | joule                             | J                                 |
| 5.    | Electric current                   | ampere                            | A                                 |
| 6.    | Temperature                        | kelvin                            | K                                 |
| 7.    | Intensity of flame                 | candela                           | Cd                                |
| 8.    | Angle                              | radian                            | Rad                               |
| 9.    | Solid angle                        | steradian                         | Sr                                |
| 10.   | Force                              | newton                            | N                                 |
| 11.   | Area                               | square meter                      | V                                 |
| 12.   | Volume                             | Cubic meter                       | m <sup>3</sup>                    |
| 13.   | Speed                              | meter per second                  | ms <sup>-1</sup>                  |
| 14.   | Angle Velocity                     | radian per second                 | rad s <sup>-1</sup>               |
| 15.   | Frequency                          | Hertz                             | Hz                                |
| 16.   | Moment of inertia                  | kilogram Square meter             | kgm <sup>2</sup>                  |
| 17.   | Momentum                           | kilogram meter per second         | Kg ms <sup>-1</sup>               |
| 18.   | impulse                            | newton second                     | Pa                                |
| 19.   | Angular Momentum                   | kilogram square meter per second  | Kgm <sup>2</sup> s <sup>-1</sup>  |
| 20.   | Pressure                           | pascal                            | Pa                                |
| 21.   | Power                              | watt                              | W                                 |
| 22.   | Surface tension                    | newton per meter                  | Nm <sup>-1</sup>                  |
| 23.   | Viscosity                          | newton second per square m        | N.s.m <sup>-2</sup>               |
| 24.   | Thermal Conductivity               | watt per meter per degree celsius | Wm <sup>-1</sup> C <sup>-1</sup>  |
| 25.   | Specific Heat capacity             | joule per kilogram per Kelvin     | Jkg <sup>-1</sup> k <sup>-1</sup> |
| 26.   | Quantity                           | SI                                | Symbol                            |
| 27.   | Electric charge                    | coulomb                           | C                                 |
| 28.   | Potential Difference               | volt                              | V                                 |
| 29.   | Electric Resistance                | Resistance                        | Ohm                               |
| 30.   | Electrical Capacity                | farad                             | F                                 |
| 31.   | Magnetic Induction                 | henry                             | H                                 |
| 32.   | Magnetic Flux                      | weber                             | Wb                                |
| 33.   | Luminous Flux or photometric power | lumen                             | lm                                |
